

Downloading and Installing Global Protect VPN & Select

<https://my.softprocorp.com/downloads>

Global Protect Install:

1. Run the Global Protect installer. Proceed clicking **“Next”** throughout the installation

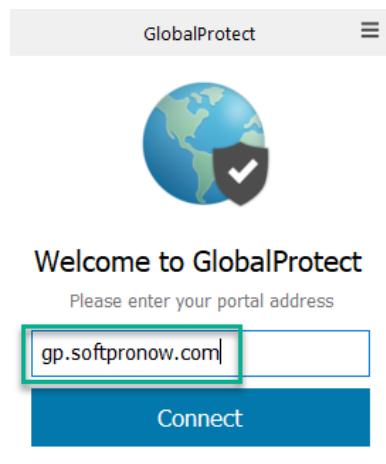

2. Windows Search **“Global Protect”**

3. Launch Global Protect – Click **“Enable”**

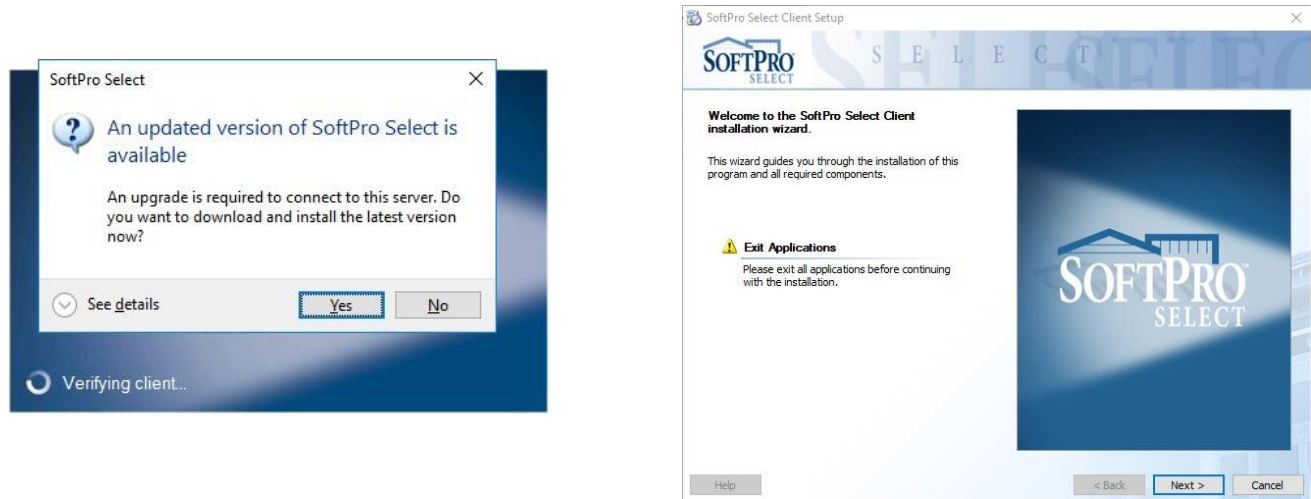

4. Enter Global Protect Server Address:

gp.softpronow.com

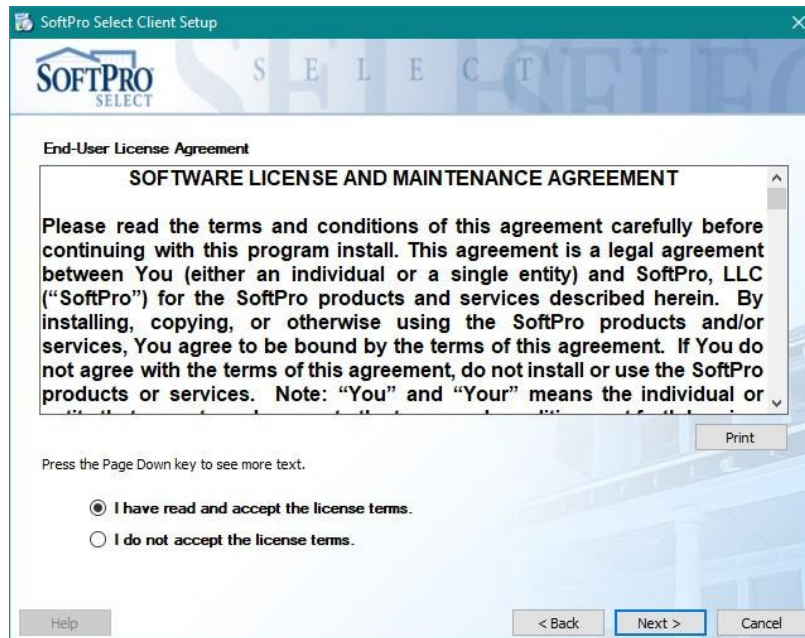

Select Install /Upgrade:

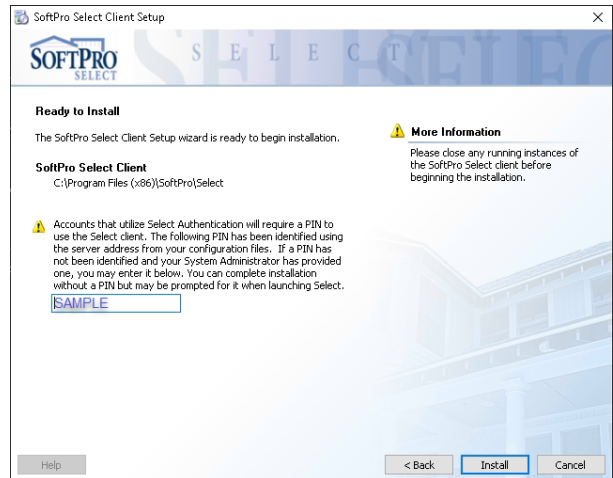

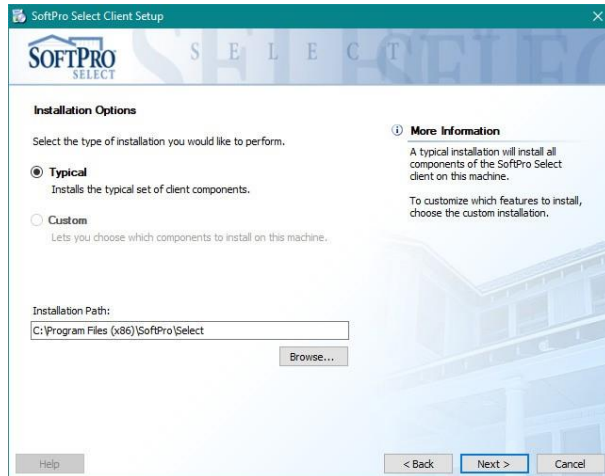

The first time you open Select after the upgrade, you will be prompted to download and install the latest version. Click *Yes* to open installation wizard, then click *Next* on the following screen.

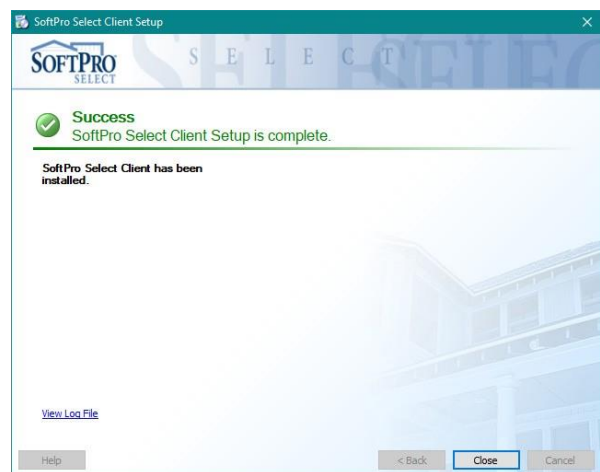

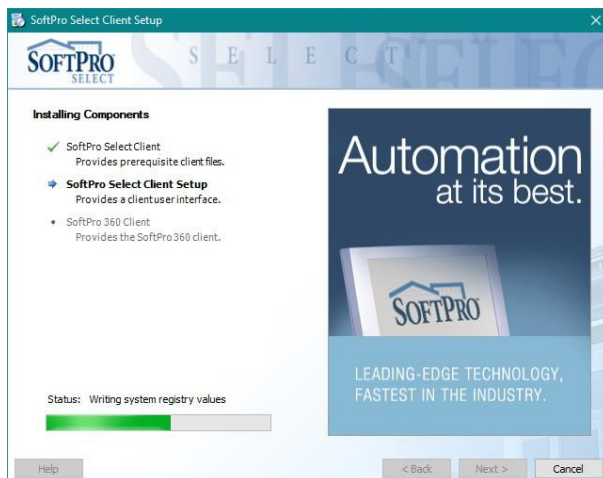

Click *Next* after you have read and accepted the license terms.

Choose the *Typical* installation option and click *Next*. A PIN will be where SAMPLE is. **DO NOT** remove the PIN. Click *Install*.

Wait for the installation of components to finish then click *Next*. Then the process is complete! Click *Close*. You can now open SoftPro Select.

NOTE: Depending on permissions specific to your computer, you may need to run the program as Administrator.

If you receive an "Access Denied" error message or if you are unable to click and drag, close Select. Then right click on the Select icon, click Properties, then under the Compatibility tab, check "Run this program as an administrator", click "OK" and open Select. Open a file, then repeat these instructions but uncheck "Run this program as an administrator".
